

GALLEY EQUIPMENT

For many domestic and international air carriers, galley equipment accounts for the highest removal rates when compared to any other component that may be required for an enjoyable experience. VE Aerospace is committed to ensuring that our customers have access to galley equipment repair services that not only improve the experience that a flight crew has but also the passengers that they are serving. We provide a wide variety of repair services to support most galley components that are not only affordable but retain the quality and reliability that our customers have learned to expect. No matter what galley equipment problems you are experiencing, VE Aerospace is sure to have the right solution to keep you flying.

WHAT'S POSSIBLE?

For many passengers, functional galley equipment is critical for ensuring a pleasant and enjoyable experience during flight. To accommodate this need, VE Aerospace offers a comprehensive range of galley equipment repair services that meet the unique requirements the industry has for both commercial and business flight operations. Some of the galley equipment repair services that we have available for our customers include:

Coffee Makers

Designed with safety and proper cabin crew operation at the forefront, our coffee maker options help deliver a high-quality flavor that passengers will love. With VE Aerospace's capability to accommodate a variety of applications and manufacturers, our coffee maker repair services ensure the cabin crew can quickly serve passengers whenever a request is made. If you need a high-quality coffee maker repair services for your aircraft fleet, VE Aerospace is certainly the source.

Aircraft Ovens

With over 80 collective years of aviation experience, the team at VE Aerospace understands the importance of a functional and efficient aircraft oven. By installing a quality oven, cabin crew members can reheat meals quickly while maintaining the flavor profile that passengers enjoy and expect when dining in-flight. Our team can help maintain your inventory of ovens.

Water Heaters

As a critical component of any aircraft galley, water heaters are designed to quickly provide warm water whenever it may be required for beverages or other applications. VE Aerospace offers repair services on all your water heaters while still maintaining low-maintenance, cost, and superior quality. If your water heater needs repairs, our team would be more than happy to assist you.

Water Boilers

Like water heaters, water boilers on aircraft must be able to heat water quickly and consistently to its boiling point for accurate and efficient beverage service. Our water boiler services ensure easy operation and low-maintenance costs. This keeps them as maintenance-free as possible and can help extend the MTBR. If you need water boiler services for your aircraft fleet, VE Aerospace is here to help with affordable, high-quality service options.

READY TO GET STARTED?

If you need specialized aircraft lighting or repair services, the team at VE Aerospace is here to help. VE Aerospace is certified by the Federal Aviation Administration and European Aviation Safety Agency.
